

# WHAT TILE GROUT SHOULD I USE?

A qualified tile contractor will consider all the important job requirements to aid you in selecting the best grout for your tile project.

## The purpose and characteristics of grout:

- Intent – Grout fills the joint between tiles to provide a hygienic and aesthetically-pleasing space.
- Appearance – Grout provides almost endless color design possibilities.
- Hygienic – Grout can offer highly mold- and mildew-resistant options as well as antifungal and antibacterial formulations.
- Maintainability – Grout products can offer extremely stain-resistant and low-maintenance options.

## Tile grout does not:

- Eliminate the need for regular cleaning.
- Replace sealant for changes in plane or required movement joints. An approved flexible sealant is required to allow for expansion and contraction.
